agency officials, legislative study commissions, and what is happening in other states to constituents' interactions as legislators.

The problem-simulation indicates that staffs in both the congressional and state level are important information sources for legislators. Influence comes through the information gathered, the issues used, and how it is presented to legislators.

Staff in the Valley Adoption Stage

While studies show that staff can be important actors in providing information and in developing alternatives for legislative action, their research finds a minor staff impact on the actual voting decision of legislators. The voting decision of legislators has been a subject of research in Congress.(Matthews and Stimson 1975; Kingdon 1973; Jackson et al, 1969; Wahlke et al, 1962). A wide variety of actors have the opportunity to shape the vote choice of legislators: constituents, party interest, legislative colleagues, lobbyists, and staff. This research shows that at the congressional level, staffs do not appear to be major influential upon the final vote of members. At the state level, the evidence is mixed regarding the impact of staff on the voting decisions of legislators.

A study by John Kingdon (1989) at congressional floor voting in the U.S. House of Representatives indicates that staff is less of an influence on the direct voting decisions of members of congress than perceived by disinterested political observers. In comparison to other key actors (constituents, administrators, interest groups, party interest, the actors congressmen) potentially influencing decisions of congress, staff

was the lowest research influence on decisions by members of Congress. Kingdon posits that staff influence is extremely subtle, as it is present only in those cases where the patterns are a particular interest. (1967). However, Kingdon did find that staff representativeness with their member of the House of Representatives. Kingdon (1967,202) concluded the policy members

Apparently, have learned of patterns yesterday back issues, the congressmen will citizen with his staff some important in order to check the possible patterns constituents in his vote. Congressmen floor aide; dislikes, on the other hand, appear to have had of his work of problem

Kingdon subscribes that his observations in the late 1960s, if done today, might yield different results. With university staff and interest of floor votes, it is likely that staff influence on floor voting influence has also increased. Kingdon's research does find believe staff to be a primary influence on floor voting members. Kingdon's study does find senior congressmen and committees are the most influential individuals on the floor voting decisions of U.S. House members.

Likewise, Sargent et al, (1965) and Hamlin (1990) does support the staff influence on the vote choices at the state legislative level. Their state studies report the most patterns on the personal values and opinions of important members as the most significant determinants of the voting records. In a more recent study, Mooney (1995) finds that "insider" committee more so the rule-all voting members of members from "outsiders" in the three state legislatures studied. Legislators'

Inflation in One Page

by Henry Hazlitt

1. Inflation is an increase in the quantity of money and credit. Its chief consequence is soaring prices. Therefore inflation—if we misuse the term to mean the rising prices themselves—is caused solely by printing more money. For this the government and its monetary policies are entirely responsible.

2. The most frequent reason for printing more money is the existence of an unbalanced budget. Unbalanced budgets are caused by extravagant expenditures which the government is unwilling or unable to pay for by raising corresponding tax revenues. The excessive expenditures are mainly the result of government efforts to redistribute wealth and income—in short, to force the productive to support the unproductive. This erodes the working incentives of both the productive and the unproductive.

3. The causes of inflation are not, as so often said, "multiple and complex," but simply the result of printing too much money. There is no such thing as "cost-push" inflation. If, without an increase in the stock of money, wages or other costs are to go up, and producers try to pass these costs along by raising their selling prices, most of them will merely sell fewer goods. The result will be reduced output and loss of jobs. Higher costs can only be passed along in higher selling prices when consumers have more money to pay the higher prices.

4. Price controls cannot stop or slow down inflation. They always do harm. Price controls simply suppress or suppress profit margins, disrupt production, and lead to bottlenecks and shortages. All government price and wage control, or even "jawboning," is merely an attempt by the politicians to shift the blame for inflation on to producers and sellers instead of their own monetary policies.

5. Prolonged inflation never "stimulates" the economy. On the contrary it unbalances, disrupts, and misdirects production and employment. Unemployment is mainly caused by excessive wage rates in some industries, brought about either by extortionate union demands, by minimum-wage laws (which keep teenagers and the unskilled out of jobs), or by pro-union and over-generous unemployment insurance.

6. To avoid irreparable damage, the budget must be balanced at the earliest possible moment, and not in some sweet by and by. Balance must be brought about by slashing reckless spending and not by increasing the tax burden that is already undermining incentives and production. □

Test Pattern 1.0

This here be some text. We want at least one page of text included in this testing because text is usually what people transmit in a fax – like a contract page with a signature. Don't get me wrong: graphics are fine but text gives us that warm and fuzzy feeling that this testing is rooted in simulating real-world scenarios.

Graphics, on the other hand, allow us to see minute transmission flaws that are easily overlooked in a text message. The brain is a wonderful thing, and can cause us to overlook small missing details. Take, for example, the car company called KIA. Have you ever noticed that the "A" is missing the bar? It looks like a "/\".

There are other examples of how the brain will fill in missing pieces of characters, or even whole words. I won't bore you with more details. The point is that text is not the best transmission to prove a fax system is working correctly.

Because the human brain is adept at recognizing patterns, the following pattern pages will easily allow one to detect even a small fax issue.

How Not to Get a Job

By ALLAN RIFF JULY 7, 2017

What do a fragrance designer, New York City cop, bed-and-breakfast manager and youth hockey coach have in common?

Each of them recently applied for an account director position at my public relations firm, along with 500 others whose experience and skill sets ranged from vaguely on-point to off-the-charts irrelevant. Auto collections manager? Home health aide? Visual merchandiser? Count them all in.

It's not that my postings on Indeed, LinkedIn and other career sites weren't explicit in outlining desired qualifications. I added instructions urging candidates to contact us only if they had backgrounds in journalism, P.R. or law. There was nothing to suggest I was looking for a fiscal benefits analyst, emergency medical technician or brand ambassador, but they showed up anyway.

In part, the disconnect stems from a revved-up labor market that encourages job hopping and inflated credentials. It also reflects the vast online jobs marketplace, where restless applicants shoot off their résumés like one of those T-shirt cannons at a football stadium, firing without aiming. Not a single candidate bothered to look us up and refer to what we do in the cover note. Instead, they all invoked grand boilerplate statements meant to impress the hiring gods.

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1 510-545-0990 (a number in Northern California.) When it's finished transmitting, point your web browser to Fax.Toys — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

AND IT WORKS V YEAH

Form W-4 (2018)

Future developments. For the latest information about any future developments related to Form W-4 (such as legislation enacted after it was published), go to *www.irs.gov/FormW4*.

Purpose. Complete Form W-4 so that your employer can withhold the correct federal income tax from your pay. Consider completing a new Form W-4 each year and when your personal or financial situation changes.

Exemption from withholding. You may claim exemption from withholding for 2018 if both of the following apply.

- For 2017 you had a right to a refund of all federal income tax withheld because you had no tax liability, and
- For 2018 you expect a refund of all federal income tax withheld because you expect to have no tax liability.

If you're exempt, complete only lines 1, 2, 3, 4, and 7 and sign the form to validate it. Your exemption for 2018 expires February 15, 2019. See Pub. 505, Tax Withholding and Estimated Tax, to learn more about whether you qualify for exemption from withholding.

General instructions

If you aren't exempt, follow the rest of these instructions to determine the number of withholding allowances you should claim for withholding for 2018 and any additional amount of tax to have withheld. For regular wages, withholding must be based on allowances you claimed and may not be a flat amount or percentage of wages.

You can also use the calculator at *www.irs.gov/W4App* to determine your tax withholding more accurately. Consider using this calculator if you have a more complicated tax situation, such as if you have a working spouse, more than one job, or a large amount of nonwage income, outside of your job. After your Form W-4 takes effect, you can also use this calculator to see how the amount of tax you're having withheld compares to your projected total tax for 2018. If you use the calculator, you don't need to complete any of the worksheets for Form W-4.

Note that if you have too much tax withheld, you will receive a refund when you file your tax return. If you have too little tax withheld you will owe tax when you file your tax return, and you might owe a penalty.

Filers with multiple jobs or working spouses. If you have more than one job at a time, or if you're married and your spouse is also working, read all of the instructions including the instructions for the Two-Earners/Multiple Jobs Worksheet before beginning.

Nonwage income. If you have a large amount of nonwage income, such as interest or dividends, consider making estimated tax payments using Form 1040-ES, Estimated Tax for Individuals. Otherwise, you might owe additional tax. Or you can use the Deductions, Adjustments, and Other Income Worksheet on page 3 or the calculator at *www.irs.gov/W4App* to make sure you have enough tax withheld from your paycheck. If you have pension or annuity income, see Pub. 505 to use the calculator at *www.irs.gov/W4App* to find out if you should adjust your withholding on Form W-4 or W-4P.

Nonresident alien. If you're a nonresident alien, see Notice 1392, Supplemental Form W-4 Instructions for Nonresident Aliens, before completing this form.

Specific instructions

Personal Allowances Worksheet

Complete this worksheet on page 3 first to determine the number of withholding allowances to claim.

Line C, *Head of household please note:* Generally you can claim head of household filing status on your tax return only if you're unmarried and pay more than 50% of the cost of keeping up a home for yourself and a qualifying individual. See Pub. 501 for more information about filing status.

Line E, child tax credit. When you file your tax return, you might be eligible to claim a credit for each of your qualifying children. To qualify, the child must be under age 17 on December 31 and must be your dependent who lives with you for more than half the year. To learn more about this credit, see Pub. 972, Child Tax Credit. To reduce the tax withheld from your pay by taking the credit into account, follow the instructions on line E of the worksheet. On the worksheet you will be based about your total income. For this purpose, total income includes all of your wages and your income (including income earned by a spouse) during the year.

Line F, credit for other dependents. When you file your tax return, you might be eligible to claim a credit for each of your dependents that don't qualify for the child tax credit, such as any dependent children age 17 and older. To learn more about this credit, see Pub. 505. To reduce the tax withheld from your pay by taking this credit into account, follow the instructions on line F of the worksheet. On the worksheet, you will be asked about your total income. For this purpose, total income includes all of

Old Testament Lesson:
Jeremiah 33:14-18

14 Behold the days come, saith the Lord, that I will perform that good thing which I have promised unto the house of Israel and to the house of Judah
15 In those days, and at that time, will I cause the Branch of righteousness to grow up unto David, and He shall execute judgment and righteousness in the land.
16 In those days shall Judah be saved, and Jerusalem shall dwell safely: and this is the name wherewith she shall be called, The Lord our righteousness.
17 For thus saith the Lord, David shall never want a man to sit upon the throne of the house of Israel;
18 Neither shall the priests the Levites want a man before me to offer burnt offerings, and to kindle meat offerings, and to do sacrifice continually

The Epistle Lesson:
Colossians 1:12-23

12 Giving thanks unto the Father, which hath made us meet to be partakers of the inheritance of the saints in light
13 Who hath delivered us from the power of darkness, and hath translated us into the kingdom of His dear Son.
14 In Whom we have redemption through His blood, even the forgiveness of sins.
15 Who is the image of the invisible God, the firstborn of every creature
16 For by Him were all things created, that are in heaven, and that are in earth, visible and invisible, whether they be thrones, or dominions, or principalities, or powers: all things were created by Him, and for Him:
17 And He is before all things, and by Him all things consist.
18 And He is the head of the body, the Church, Who is the beginning, the firstborn from the dead; that in all things He might have the preeminence.
19 For it pleased the Father that in Him should all fulness dwell;
20 And, having made peace through the blood of His cross, by Him to reconcile all things unto Himself; by Him, I say, whether they be things in earth, or things in heaven.
21 And you, that were sometime alienated and enemies in your mind by wicked works, yet now hath He reconciled
22 In the body of His flesh through death, to present you holy and unblameable and unreproveable in His sight:
23 If ye continue in the faith grounded and settled, and be not moved away from the hope of the Gospel, which ye have heard, and which was preached to every creature which is under heaven; whereof I Paul am made a minister

---

The Gospel Lesson:
Luke 1:1-25

1 Forasmuch as many have taken in hand to set forth in order a declaration of those things which are most surely believed among us,
2 Even as they delivered them unto us, which from the beginning were eyewitnesses, and ministers of the Word
3 It seemed good to me also, having had perfect understanding of all things from the very first, to write unto thee in order, most excellent Theophilus,
4 That thou mightest know the certainty of those things, wherein thou hast been instructed.

Recycling Program

The Department of Public Works and our contractor JRM Hauling & Recycling of Peabody would like to remind you how to properly prepare your recyclables.

Please recycle **all plastic containers numbered 1-7** All commingled materials (glass, metal and plastics) should be placed in your recycling bin, no need to sort. If you cannot fit all materials in the bin, place the extra in **plastic bags** *Do not put in paper bags*

All paper paperboard and newspapers should be handled as usual place in paper bags or bundle Please make sure that cardboard is cut no larger than 3 X 3 and bundled.

The Public Works Department and JRM would like to thank you for your cooperation If you have any questions please contact the Department of Public Works at (781) 942-9077

PLEASE NOTE

RECYCLING IS MANDATORY!

MERCURY PRODUCT COLLECTION

Attention Reading Residents and businesses

Do not dispose of thermostats, thermometers, or fluorescent light bulbs These products contain mercury which can be harmful If not managed properly

DPW Facility 75 Newcrossing Rd

Business owners 36 bulbs or more, call Dan Rusty at Covanta Energy (978) 241 3002

For Compost Center information and Schedule please see the reverse side.

STREET SWEEPING PROGRAM

What the Department of Public Works puts down for snow and ice control in the winter the Department of Public Works has to pick up in the spring.

Residents are asked to sweep their sidewalks and tree lawns (the grass strip that often exists between the walk and the roadway) onto the street Please don't sweep the sand into a pile since that makes it more difficult for the sweepers to pick up the material. Instead, sweep it into a row along the curb We hope to start sweeping the week of March 23 2009 weather permitting.

If you have any questions regarding the sweeping program please contact the Highway Division at (781) 942-9092 or the D P W Administration office at (781) 942 9077

When I see something like this I find it difficult to tell whether it is just someone else with far too much time on their hands or an interesting creative project. Maybe both

HOW TO *PROPERLY* LUBE YOUR CHAIN

By Eric McKeegan Illustrations by Stephen Haynes

Odds are, you ride a bike. The odds are also good that your bike has a chain. A chain needs lubrication.

Lubing a chain is perhaps the most ignored maintenance task. It doesn't have to be that way. A few very basic supplies and a wee bit of know-how is all it takes to keep your chain lubed and happy.

Supplies

Chain Lube. An obvious one. Best to go to a shop and ask for recommendations specific to your area and riding habits, but always always always go with the drip bottle, not aerosol. Drip bottles keep the lube where you want it, not all over the rims, tires, frame, and your floor. As a rule of thumb, lubes marked wet are best for wet conditions, and dry lubes work best when things are dry. But either one is better than no lube at all.

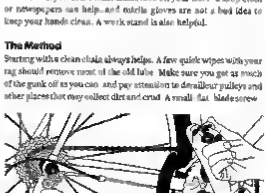
A rag or two. Paper towels can work, but you are better off with something more sturdy and absorbent. Old T-shirts are a favorite here at the *Bicycle Times* workshop.

A brush and/or a small flathead screwdriver. For to remove the gunk!

That's it. If you don't want chain lube on your floor, a drop cloth or newspapers can help...and nitrile gloves are not a bad idea to keep your hands clean. A work stand is also helpful.

The Method

Starting with a clean chain always helps. A few quick wipes with your rag should remove most of the old lube. Make sure you get as much of the gunk off as you can, and pay attention to derailleur pulleys and other places that may collect dirt and crud. A small, flat, blade screw



Ed. Note: In this new column, we'll give advice on maintenance and repairs of your beloved bicycle(s). Our Tech Editor Eric McKeegan will be the main author, and he'll be drawing on his own experience as well as that of the staff. A lot of us are former shop rats. Got a question? Send it to techeditor@bicycletimesmag.com.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

go to faxzero.com

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero: this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

3 What does it take to Bribe?

Cold hard gil and lots of it. The exact cost to Bribe is twenty times a particular monster's max HP - if the monster can't kill you, it's certainly going to want to extort every last penny from you. They don't call them "leeches" for nothing. NEVER EVER bribe a monster that is afflicted by "Sleep" status, because sleeping monsters are not mriban e, and you will have wasted any gil you used in doing so.

4 Do some monsters offer better "deals" than others?

Yes, definitely! For example, you can obtain Wings to Discovery from the Marlbero and the Great Marlbero - but the Marlbero charges you 540,000 gil for 4 Wings to Discovery while the Great Marlbero charges you 1,200,000 gil for 8 Wings to Discovery - that's over twice as much for only twice as many items. (Remember what I said about monsters exterting every last penny from you?) Another example is with Soetulems - the Master Tanbarry will give you 3 Pendulums for 360,000 gil - BUT the Ultima Weapon will give you 33 Pendulums for 1,480,000 gil. Now ther is an incredible deal!

5 So what are some must bribe items?

Some of the best deals for rare items include:

- Level 1 Key Sphere x40 for 400,000 gil from the Dragonlith
- Level 4 Key Sphere x2 for 186,000 gil from the Chimera Brain
- White Magic Sphere x2 for 250,000 gil from the Dark Flan
- Black Magic Sphere x2 for 152,000 gil from the Black Element
- Skill Sphere x2 for 300,000 gil from the Zeo
- Special Sphere x6 for 1,000,000 gil from the Adamantoise
- Dear to Tamarrae x2 for 74,000 gil from the Mech Leeher
- Mega Phoenix x2 for 0,000 gil from the Alcyone
- Chocobo Wing x60 for 360,000 gil from the Machaa
- Ether Terbo x16 for 81,000 gil from the There
- Wings to Discovery x4 for 540,000 gil from the Marlbero
- Remdalum x33 for 1,400,000 from the Ultima Weapon
- Reagan Cur9 rib for 157,000 gil from the Taurus
- Remedy x80 for 92,000 gil from the Sword Echu
- Winning Formula x15 for 900,000 from the Sand Worm
- Supreme Gem x28 for 260,000 from the Helms
- Healing Spring x20 for 90,000 from the Octopus

6 Now, where can I get that much gil?

The Wimic Boxes in the Omega Ruins are pretty easy to defeat, and they leave behind 50,000 gil per battle - 100,000 gil if someone in your active party is equipped with a weapon with the [Gillionaire] auto-ability. Alternately you can repeatedly kill Dee-Kye or the Monster Arena who will drop weapons with [Triple AP] which you can sell for 80,000+ gil apiece. For the conditions to Select Dee-Kye - please see my Monster Arena FAQ.

7 I bribed a monster, but I got less or more of the number of items you list

Will Cloud Computing Kill the Data Center?

With cloud computing and SaaS making forays into the enterprise, is the data center as we know it dead?

Obviously data centers will still exist in some form, but will these soon be confined to large service providers and Fortune 500 companies?

According to a recent report recent report from the University of California at Berkeley, cloud computing services are a really five to seven times more cost effective than traditional data center ones.

Even if you're a cloud skeptic, don't be surprised if someone from the business side of your organization starts asking about cloud because of cloud-like this one. In a deep recession, the lowest common denominator is cost. Any technology proven or not, that promises to cut costs will get attention — whether IT likes it or not.

However that doesn't mean you need to start migrating your applications to Google or Amazon right away. What it does mean, though, is that you need to have a strategy you can articulate, even if that strategy is simply to wait and see.

"You may see some applications, low-criticality applications like e-mail being outsourced, but any real impact cloud computing will have on data centers is several years off," said Nick Simpson, an analyst with the Burton Group.

A slew of obstacles prevent enterprises from moving critical applications to the cloud today, including lack of SLAs and data-privacy and compliance issues. There's also the fact that most cloud computing vendors don't run the same applications that corporations do.

"Either your software vendors have to rewrite their applications or you have to rewrite your in-house applications. There are quite a few of barriers to that at the moment," Simpson said. "The shortest path to the cloud for most organizations will be through virtual machines, where you can take an existing virtual machine and simply push it to the cloud."

Even moving virtual machines dredges up several issues, including bandwidth, latency and availability. "I think enterprises will ultimately move a significant portion of their applications suites — or equivalent applications — into the cloud, but it's a long ways off," he added.

The Elephant in the Room: Google

Google has been using the cloud as one of its strategies to poach in areas that Microsoft has traditionally owned. Gmail and Google Apps are quietly picking away at Microsoft Office, and no one seems to mind — or even notice — that these are cloud-based applications.

Test your fax machine

To test the capability of your fax machine follow the directions below

NOTE

Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing ***82** before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE

Whenever troubleshooting a fax issue, it is good practice to set the ***Automatic Reports*** option to **Every Error** before attempting a test fax. This way, even if the sent fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available in different places on different products, consult the product *User's Guide* for specific steps.

1. Send a one page black and white text fax to **1-888-hpfaxme** (1-888-473-2963)
2. When your fax is received by the HP Test Fax Service we will generate a return fax to you within five

Customer Agreement for PO Box Services

The Postal Service is offering the following new services for PO Box customers at the Post Office® location:

- Street Addressing
- Signature on File
- Real Mail Not Boilerplate™ Service

A. Street Addressing Service for your PO Box

With this service, you will have the option of using the street address of the Post Office location for your mailing address in addition to your PO Box number. For example, if a Post Office is located on 500 Main Street and you have PO Box 59, your mail would be addressed 500 Main St at #59. You will also be able to use the street address to receive most packages and deliveries through private carriers, such as UPS and FedEx. Both Street Addressed mail and PO Box addressed mail can now be delivered to your PO Box.

1. When you sign up for the option, your new street address format will be:

_____ #_____
Post Office Street Address PO Box Number

_____ _____ _____
City State PO Box Zip Code

2. Please note that you are limited to this address format, including both the # sign and your PO Box number. For example, you may not use "Suite" or "Apt." Mail you receive at your PO Box without using the correct address format may be returned to sender.

3. You may not use the street address option as your physical residence or place of business in legal documents. Misuse of your street address in this manner may result in closing your PO Box and may be in violation of civil and criminal laws.

4. You may use this address only for items that can be delivered through the mail. For example, you may not use the street address to receive shipments of wine, as per alcohol items over 70 pounds or items prohibited by Postal Service policy (see *Domestic Mail Manual (DMM)* Section 601), even though private carriers can carry those items. Any such shipments will be refused or held for pickup by the private carrier. The DMM is available at *http://pe.usps.gov/*.

5. If you close your PO Box, you must submit *two* Change of Address (COA) forms: one for the PO Box address and one for the street address. Both forms must be forwarded to the same delivery address. Mail for a PO Box with street addressing cannot be forwarded to free delivery addresses.

6. If you decide to discontinue street addressing, mail bearing the street address will be delivered to the PO Box without charge for an additional 30 days. The 30-day period is designed to give customers enough time to communicate the address change to their mailers. After the 30-day readjustment period, all mail addressed to the PO Box street-style address will be returned to sender as undeliverable as addressed.

NOTE: Street Addressing is not available for Caller Service, Reserve Number, or Group E Box customers.

___ (Please initial.) I would like to participate in Street Addressing.

STORY: Massad Ayoob

DO "CIVILIANS" NEED SPARE AMMO?

Some think spare ammo is paranoid. This writer thinks it's just good sense.

Reader Mike Wilson writes, "There are undoubtedly extraordinary situations like camping in the wilderness where someone might be attacked by bad guys and need an arsenal and special skills for defensive purposes.

"I'm not sure I agree with you and many others on law enforcement concerning issues a handgun for dedicated purposes in the home or restricting what ammo

I and decent citizens are going to. If the concealed-carry issue comes on personal purpose. What say you?

It is only necessary to know how to reload a revolver quickly."

Editor Jeff Zoller responded me to answer. Let me start by saying I know how Mike thinks, cause we've had many chats that's how I thought I. I was on my own time, kind of working for the police department, who were the numbers of most other than the five .38 revolvers in my S&W Chief Special, the six in my Colt Detective Special, or the eight-shot-chamber—up of .45 autos in my Government Model.

As life went on, and my career it and me researching gun parts, I started seeing the need for more ammo.

During that period soft body armor came on the market, most used by the bad guys almost as soon as it was by the cops. Some more criminals were wearing "bulletproof vests" than in the time of John Dillinger. Armor-piercing rifle ammo, armed robbers on the rooftops, gunbattles and more I'd talked. By the time you read this I'm about to the third re-engineering of my body to adjust to the changes my life has undergone and to supply me to be good.

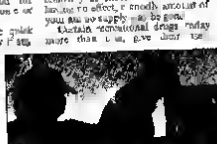
Certain recreational drugs today more than ever, give their users an almost mystical resistance to pain and even to wounds that would kill a sober person. Add to that the fact that many criminals are now using assault rifles such as the AK-47 and the AR-15 and you're making their handguns harder to hit and less demanding more shots to stop him. And of course, predators are always two to ahead. All these realizations have a cumulative with an eagle gun and an unprotected policeman and that's assuming every bullet we fire from where I'm aware which history tells us is an optimistic assumption.

Malfunction Junction

The cost of guns can jam with auto guns, but I believe it's often in the magazine and even if you're a double-stack you can still compress the magazine in the pistol. In either case, an extra pull that unloaded and replacing with a fresh one is usually the best way to clear the stoppage and get back in the fight. Revolvers are not exempt from malfunctions either. A common cause of a locked-up revolver is overloading with a too-long ammo which prevents the cylinder from rotating and therefore the gun from firing. The quickest fix? Open the cylinder, eject the round that's a problem, and get back to work.

Let's say you've been attacked by the woods by man or beast, and the ammo is running out. You're on your own, and you're not in immediate danger, you don't know how many others may be lurking in the area, but you still want to get home in good shape, and the investigation begins. You may be detained, or perhaps even completely free. I may say, get all the way up where I live. It's not at it is a place for self-defense, and I suspect you do, too. To be able to move in that direction, you need ammunition appropriate to whatever you have, you need more ammunition than you can hold in your hands.

What I've taken my share of



Fn new national NRA classic Tom Yost (at left) and Jim Smith fire their guns at Cowtown Gun in 2018. Their rifle AR15 ammo with its muzzle-short guns factored will certainly run dry when firing at the shots per second.

HISTORICAL HAPPENINGS

1803 The Louisiana Purchase is completed at a ceremony in New Orleans.

1977 First Space walk made by Soviet G Grechko during Salyut 6 EO-1 mission.

2007 Queen Elizabeth II becomes the oldest ever monarch of the United Kingdom, surpassing Queen Victoria, who lived for 81 years, 7 months and 29 days.

WARNING! ENTERING THE PUN ZONE!

When an Indian shaman succeeded in driving an evil spirit out of a beautiful maiden of the tribe, she exclaimed "Thank you very much!" and proceeded to hug the medicine man. The medicine man's squaw was angered by the maiden's gesture of gratitude, and told the maiden in no uncertain terms "Don't squeeze the Shaman!"

At my wedding reception I stood to say a few words. I turned to my bride's mother "You've given me a gift." I began 'a gift that..."

As I paused in thought my new mother-in-law completed the sentence, "That you can't return!"

I went to Confession after years of being away from the Church. Inside I found a fully-equipped bar with Guinness on tap. On one wall there's a row of decanters with fine Irish whiskey and Waterford crystal glasses. On the other wall is a dazzling array of the finest cigars and chocolates.

Then the priest comes in. I say to him, "Father, forgive me, for it's been a very long time since I've been to Confession, but I must admit that the confessional box is much more inviting than it used to be."

He replied, "Get out, you idiot. You're on my side."

QUIP OF THE DAY *What's on your mind? If you'll forgive the overstatement - Fred Allen*

Thought for the day *... I sometimes think we expect too much of Christmas Day. We try to crowd into it the long arrears of kindliness and humanity of the whole year. As for me, I like to take my Christmas a little at a time, all through the year. And thus I drift along into the holidays; let them overtake me unexpectedly - waking up some fine morning and suddenly saying to myself, "Why, this is Christmas Day!" - David Grayson*

Secure Your Tax Records from Identity Theft

Identity theft occurs when someone uses your personal information such as your name, social security number (SSN), or other identifying information, without your permission to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN
- Ensure your employer is protecting your SSN and
- Be careful when choosing a tax preparer.

Call the IRS at 1-800-829-1040 if you think your identity has been used inappropriately for tax purposes.

Victims of identity theft who are experiencing economic harm or a system problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free *[illegible]* 1-877-777-4778 or TTY/TDD 1-800-829-4059.

Protect yourself from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, forward this message to *[illegible]*@irs.gov. You may also report misuse of the IRS name, logo, or other IRS personal property to the Treasury Inspector General for Tax Administration at 1-800-366-4484. You can forward suspicious emails to the Federal Trade Commission at: spam@uce.gov or contact them at www.consumer.gov/idtheft or 1-877-IDTHEFT(438-4338).

Visit the IRS website at www.irs.gov to learn more about identity theft and how to reduce your risk.

Privacy Act Notice

Section 6 09 of the Internal Revenue Code requires you to provide your correct TIN to persons who must file information returns with the IRS to report interest, dividends, and certain other income paid to you, mortgage interest you paid, the acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA, or Archer MSA or HSA. The IRS uses the numbers for identification purposes and to help verify the accuracy of your tax return. The IRS may also provide this information to the Department of Justice for civil and criminal litigation, and to cities, states, the District of Columbia, and U.S. possessions to carry out their tax laws. We may also disclose this information to other countries under a tax treaty, to federal and state agencies to enforce federal nontax criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism.

You must provide your TIN whether or not you are required to file a tax return. Payers must generally withhold 28% of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to a payer. Certain penalties may also apply.

Prayer to St Joseph over 1900 years old

O St Joseph whose protection is so great so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph I never weary contemplating you and Jesus asleep in your arms I dare not approach while He reposes near your heart Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath St Joseph, Patron of departing souls, pray for us Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle

Make this prayer known everywhere.

About This Test

The Praxis Early Childhood: Content Knowledge test is designed to assess the content knowledge prospective early childhood teachers must have in order to support children's learning in the content areas. The test consists of 120 multiple-choice questions, each of which pertains to one of six content areas: language and literacy, mathematics, social studies, science, health and physical education, and creative and performing arts. Questions will assess whether the test taker knows the major concepts, skills, and order of inquiry in the content areas, can apply knowledge of the content areas in the context of children's learning, knows the structure of the content areas, and knows how the content areas are interrelated.

The test does not emphasize knowledge of pedagogy, though some questions are framed in the context of children's learning. The test may contain some questions that will not count towards your score.

2 Draw the graph of $y = x^2 - 2x - 8$ and use it to solve the equation $x^2 - 4x - 8 = x - 3$ $x = 5.9$ & $x = 0.9$

3 Draw the graph of $y = x^2 + x - 5$ and use it to solve the equation $x^2 - x - 4 = 0$ $x = -2.6$ & $x = 1.6$

Our Father, which art in heaven,
hallowed be thy name,
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses,
as we forgive them that trespass against us
And lead us not into temptation,
but deliver us from evil
[For thine is the kingdom,
the power, and the glory,
for ever and ever]
Amen

Abstract—Interleukin (IL)-2 is a potent stimulator of the cytotoxic/cell-killing enzyme perforin. It is characterized as a T cell growth factor, but its expression only in the antigen-activated cytotoxic T lymphocyte (CTL) subset is unique. Here, studies investigating the mechanism(s) of IL-2 expression in CTL are reported. Cyclosporin A (CsA), a specific inhibitor of calcineurin, a calcium-dependent phosphatase, was found to be a potent inhibitor of IL-2 mRNA expression in CTL. Interestingly, CsA did not affect the expression of IL-2 receptor α-chain (IL-2Rα) mRNA. Furthermore, CsA did not affect the expression of IL-2Rβ mRNA, which is constitutively expressed in CTL. Thus, CsA appears to be a selective inhibitor of IL-2 expression in CTL. Department of Consumer Affairs

Debt Collection: Money Judgments and Frozen Bank Accounts

Information for Consumers

Debt collection was the #1 complaint category for the Department of Consumer Affairs (DCA) in 2008, with complaint volume nearly doubling nearly 70% compared to 2007. Although DCA can mediate many of the complaints we receive, we cannot mediate disputes that involve money judgments and frozen bank accounts. To help you protect yourself—and your money— DCA created this fact sheet which tells you where to turn when you need assistance.

Money Judgments

What is a money judgment?
If a person or company (known as the "creditor") sues you, claiming that you owe a certain amount of money, and the judge decides in the creditor's favor, the judge awards a "money judgment." The creditor has a right to try to collect that money from you or, say my own judgment. If a court has a money judgment against you, that creditor has a right to take money directly from your bank account or to pay off the debt.

If I have a money judgment against me, what happens to the money in my bank account?
One way a creditor can try to collect on a money judgment is to serve legal papers to the bank or credit union requiring it to restrain or freeze a consumer's bank account. This allows a creditor to take money directly from the account.

Can a creditor take all of my money to satisfy a money judgment?
In New York State as of January 1, 2009, even if a creditor has a judgment against you, the creditor cannot take, restrain or freeze all of the money in your account—*no matter how much you owe.*

Exempt Funds

Under State and Federal law, certain money may never be taken by creditors to satisfy money judgments. (See *Are there exceptions to the Exempt Income Protection Act?*) This money is considered "exempt funds." You may choose to use exempt funds to pay a debt you owe, but a creditor cannot freeze or forcibly take these funds from you or your bank account to pay off a debt.

Exempt funds include the following:

- ✓ Supplemental Security Income (SSI)
- ✓ Social Security retirement
- ✓ Social Security Disability (SSD)
- ✓ Public assistance (Temporary Aid to Needy Families, TANF)
- ✓ Income earned while receiving SSI or public assistance
- ✓ Disability benefits
- ✓ Workers' compensation benefits
- ✓ Veterans' benefits
- ✓ Child support benefits
- ✓ Spousal support (maintenance/alimony) or child support
- ✓ Railroad retirement
- ✓ Unemployment benefits

Marsha's Terrible Job Interview

Marsha had a job interview with the Sunshine Biscuit Company last Monday. Her appointment with the interviewer was for 10:00 am. She had forgotten to set her alarm clock, so she woke up at 9:30 am and got to the interview an hour late, at 11:00 am.

Because she woke up so late, she didn't have much time to get ready. She took a quick shower and put on the first dress that she found in her closet. It was a very short dress that showed a little too much, the kind of dress a woman wears when she's trying to attract a boyfriend at a cocktail party. She also put on a lot of very cheap perfume, the kind you can smell down the street.

She left the house without eating breakfast and she ran to the bus stop. The bus was late in coming, but she didn't want to spend the money on a taxi. When she finally got to the Sunshine Biscuit company, she ran into the building and ran into the interviewing office. She ran up to the secretary's desk and screamed, "I'm here! My bus was late!" The secretary was a bit surprised, but asked her who she was and what time her appointment was for. Marsha answered, "I'm Marsha and my interview is for right now." Of course, it was already 11:00 am and her interview had been scheduled for an hour earlier.

The secretary called the interviewer, Mr. Green, on the intercom and he told her to send Marsha in.

Marsha was chewing gum as she entered the office. She took a seat without saying anything to Mr. Green. Mr. Green was slightly surprised to see Marsha act so boldly, even though she was an hour late. He introduced himself and asked how she was. She said that she was feeling lousy and that the public transportation in the town was awful. He asked her what kind of position she was looking for, and if she had a resume. She said that she had no resume because she didn't have time to write one. She also had no idea of what kind of job she wanted, she just wanted one that paid well. He asked her if she had any questions for him, and she asked him if she could have Wednesday afternoons off so that she could see her psychiatrist. She also asked him if the company gave at least a two-week vacation. He asked her what skills she had and she answered that she could type, but that she couldn't take a typing test because tests made her nervous.

Mr. Green thanked Marsha for coming, and she asked, "Do I get a job or not?" He said that he would call her if there was an opening, and she said, "Well, hurry please, because I'm broke and I can't pay the rent."

Super-Charged Supper: Joy Bauer's Balsamic Chicken with Quinoa and Greens

By Parade

Pack your plate with eight super foods via this simple meal from Today nutritionist and cookbook author Joy Bauer

- Serves 4
- Active Time 20 min
- Total Time 55 min

Ingredients

- 1 Tbsp olive oil
- 1 yellow onion, thinly sliced
- 2 large red bell peppers, sliced
- 4 cloves garlic, minced (may substitute 1 tsp garlic powder)
- 4 (4- to 6-oz) skinless, boneless chicken breast halves
- ¼ tsp red pepper flakes (or to taste)
- ¼ tsp coarse salt
- ¼ tsp ground black pepper
- ½ cup balsamic vinegar
- 1 (15-oz) can diced tomatoes, well drained (preferably no salt added)

Directions

1. Coat a large saute pan with oil, and preheat the pan over medium high heat. Add onion and bell pepper and sauté for 5 minutes
2. Add garlic (or garlic powder) and red pepper flakes and saute for 1 minute, stirring constantly
3. Season chicken breasts with salt and pepper. Add chicken breasts to the pan and cook for 4 minutes on each side
4. Add vinegar and tomatoes and bring liquids to a boil. Reduce the heat to medium-low and simmer uncovered for 25 minutes, stirring occasionally. Serve with quinoa and sautéed greens

Cook's Note

Balsamic Basics

The Rolls-Royce of balsamic vinegar, Aceto Balsamico Tradizionale, is aged a minimum of 12 years and is too thick and pricey for everyday use. Instead look for balsamic made from red wine vinegar and grape must or Mosto d' Uva. Avoid bottles that include sugar and caramel coloring.

Rosalind Stanley: Pike County Youth Leadership Sponsor Extraordinaire

Hello and welcome to a new year of PCYLC! I have been so impressed by the number and the quality of applications this year. So far this has been the greatest number ever to apply. Therefore I expect this to be the greatest year ever for the Council. I expect us to do marvelous things. We can you know. Each of us has within us some talent, some ability to do something great for someone. It doesn't have to be some thing huge. It can be something simple. It can be something as simple as being kind to someone who is in deep need for kindness. It can be as easy as lending a supporting hand to someone who is friendless and alone.

In the Pike County Youth Leadership Council we hope to build upon and fine tune within each of you that desire that is already there... to help people, to lead in a positive way and to bring about social change that will improve our world. You have the power to you to do that. I have seen it happen. The American hockey player Douglas Everett once said, "There are some people who live in a dream world and there are some who face reality and there are those who turn one into the other." I hope for each of you that you have dreams and that you dream big and not only for yourselves but for the world.

PCYLC is here to help you turn those dreams into reality.

-Rosalind

"...active members enjoy the council and meetings far more than those that don't."

Words of the Wise: Tyler Fields- Pike County Youth Leadership President

To All Members

Congratulations and welcome to the 2009-2010 Pike County Youth Leadership Council. I hope that this year goes extremely well and you truly enjoy yourselves, however I do want to make it known that what you put into PCYLC is what you will get out. My experience has been that active members enjoy the council and meetings far more than those that don't. If there is one thing I want you to know it is that you shouldn't be afraid to speak up. If we are in a discussion and you have something to say simply say it. We want your opinions or we wouldn't be asking for them. The officers of the council are here to simply guide and facilitate the council. The members make it what it is.

I have big hopes for the council this year and I hope that everyone will help me and the officers, make it the best council we have had thus far. I am very excited to see what this year brings us. If you have any suggestions for ideas/projects don't be afraid to tell any officer, let your voice be heard. Once again I am excited and I hope you are too.

Tyler Fields

4. Borrow from your retirement savings Your employer may allow you to borrow money from your 4 (k) up to 50% of your plan to a max mum of $50 000 The loan must be repaid n full within five years Also you can borrow from your IRA once each year per account As long as you redeposit the money your IRA within sixty days no penalties or taxes are assessed However this should be your last option If you cannot repay your retirement plans your long-term financ al security is undermined In addition failure to repay on time will have adverse tax consequences and reduce savings available in the future retirement

Save while you spend
Make the best use of your credit by switching to a card that offers cash back on purchases or rewards and services that match your needs

Long term prevention

If you've been through a cash flow crunch you know it's not something you want to repeat And neither do your creditors who may be less accommodating in the future Here's how to create more financial security

1. Permanently reduce expenses Your money shortfall taught you how to tighten your financial belt Now instead of loosening it keep up those money-saving habits

2. Create a budget It's hard to know whether you're living within your means if you never add up your expenditures Record everything you buy for a month review it to see where you can cut back and allocate a sizeable chunk for savings (10-20%)

3. Build your emergency fund As your new budget frees up some funds take that money to start an emergency savings fund with the goal of saving 3-6 months of living expenses Put the money in a savings account you have limited access to Now if you're ever in a cash crunch you've got it covered

What's next? Is debt consolidation right for you?

Part II - Research

a) Complete 2 interviews with two training providers which could provide the requesting training. Of the two decide which training provider offers the better training package that will meet your needs. Also a tentative letter of acceptance from the trainer with the course start and end dates, course tuition and related cost etc.

b) Also required is interviews with two individual people who are employed in the field for which the client is applying for training in. This is to ensure the client knows about the various aspects of the employment conditions which further ensures the client will be making an informed decision about this training.

c) Client is also required to provide a half dozen job vacancies postings that demonstrates that there is employment in the field. These can come from HRDC job bank print outs or the newspapers classified ads. The positions should be local unless the client specifically is intending to leave the area for his/her employment opportunities.

d) Compulsory letter of potential employment offers upon completion of the training. Far too often clients receive their training and are not able to obtain employment.

The above are the basic requirements clients are obligated to meet in order to be considered for course funding. If you have any questions or require further clarification on any of the above please feel free to call me collect (if necessary) at your convenience.

Yours Sincerely

SIGNAL PHRASES

It is necessary not only to cite all sources but also to make clear which information comes from you and which comes from a source. Signal phrases help to introduce material borrowed from a reference. One word, a phrase, or a full sentence might be used to introduce the borrowed material. You can choose signal words to introduce a quotation, paraphrase, or summary keeping in mind that your word or phrasing choice can help to guide the reader into the idea of your source. For example, material paraphrased from a science journal might be introduced using the word reported. Morgan (1990) reported that genetic material could be relocated.

Signal phrases often incorporate verbs or verb phrases. The verb needs to fit the context, such as whether the source claims, argues, observes, concludes, refutes, or states. A list of verbs follows to assist you with thinking about possibilities for your own writing; should you use any of these words, be sure your selection fits the context.

	Steps to Complete Your Claim
1	Fill out the Claim Affidavit, being sure to sign the document.
2	Attach a photocopy of a Valid ID (See Examples of Valid IDs below)
3	Fax your documents to [redacted]

Examples of Valid Personal Identification

The following types of personal identification will be considered valid forms for this process:

Drivers license (US or Canada) Visa / Resident Alien Permit (Green Card) US or foreign passport
Matricular Consular ID (Mexico) US military ID card (Active or Retired) State issued ID card

Important Reminders

- The name on the ID must match the name on the account. If the name does not match then additional documentation may be required. Lightening and increasing the size of the ID before faxing assists with the review of your documents and helps to prevent delays in claim processing.
- All forms of identification must be legible, unaltered, and legitimate. The ID also cannot be expired. If the ID appears altered, forged or not legitimate, we will not be able to proceed with your claim.
- Student IDs, work IDs, birth certificates and Social Security cards are not acceptable as valid identification

EXAMPLES – The following are some examples of valid forms of photocopied personal identifications.

Drivers License	Resident Alien Permit	US or Foreign Passport	Matricular Consular ID	US Military ID Card

Please handwrite your Claim ID number on your ID before faxing.

- The easiest way to find the make and model of the phone you are claiming is to take off the back cover and battery. The make and model should be listed near the barcode on the back of the phone.
- If you do not have the phone you may want to check your receipt from the purchase of the phone, your service agreement, the box the phone came in, a recent copy of your bill or your Metro PCS account at http://www.metropcs.com/
- Please fax all documents together and ensure that all information is legible before faxing. An illegible claim number or wireless phone number or missing page could result in a delay in processing your claim

You may call Asurion at 1-866-862-3697 if you have questions regarding these instructions or affidavit form.

JESUS IS THE ROCK & HE ROLLS MY BLUES AWAY

Chorus:
Jesus is the Rock and he rolls my blues away
Jesus is the Rock and he rolls my blues away
Jesus is the Rock and he rolls my blues away

When you wake up in the morning
And the sky ain't bright and blue
When you wake up in the morning
And the big world's after you
When you wake up in the morning
Jesus' gonna pull you through

Chorus:

When you're out on the streets
And you're really feelin' down and low
When you're out on the streets
And there's really no place to go
When you're out on the streets
Jesus' gonna save your soul

Chorus.

When you look in the mirror
And your face causes it to crack
When you're through with your day
And you feel like you've been attacked
Well Jesus' gonna love you
And baby now that's a fact

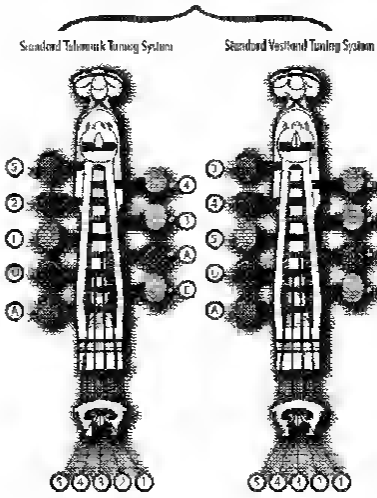
Typical Hardanger String Configuration and tuning



String order

Most Hardangers fiddle use the Telemark system for under string order. From front to back the strings are tuned as follows: A, E, U, 3rd, 2nd, 1st. Some fiddlers prefer the Vestland system where the U and E strings are reversed.

Tuning Fine tuners and pegs

The under strings are very light gauge strings (.020 to .024 inch) and will break easily. Make sure you know the tuning order and the fine tuner system. You can use a peg to tune them or the fine tuners. Tuning on the under strings can be very difficult and will cause the fine tuners to fail easily.

Alternative under strings

The under strings are tuned to the 2nd, 1st, A, E, U strings and are 24 gauge strings (.024 inch). The 2nd string is 20 gauge strings 3 and 4 should be attached to the fine wire hook on the tail piece. 3, 2, and 1 are all the same gauge strings and are tuned to the same

Difficulty: Moderately Easy

1. Launch Outlook. Click "Tools," then click "Account Settings."
2. Click the "Email" tab, then click the "New" button.
3. Click the radio button labeled "Microsoft Exchange, POP3, IMAP, or HTTP" and click "Next."
4. Place a check in the box labeled "Manually configure server settings or additional server types" and click "Next."
5. Select "Internet Email" and click "Next."

'Potentially' vs. 'Realistically' (Cont.)

The boy then went to his sister and asked, "Would you sleep with Brad Pitt for a million dollars?"

"Oh, my Gawd! I LOVE Brad Pitt," replied his sister. "I would sleep with him in a heartbeat, are you nuts?"

Then the boy went to his brother and asked, "Would you sleep with Brad Pitt for a million dollars?"

"Of course," his brother replied. "Do you know what a million bucks would buy?"

The boy pondered the answers for a few days and then went back to his father, who asked him, "Did you find out the difference between 'potentially' and 'realistically'?"

"Yes," replied his son. " 'Potentially', you and I are sitting on three million dollars; but 'realistically', we're just living with two hookers and a gay guy."

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero; this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax

$300,000 OF TERM LIFE INSURANCE

April 2013

Dear Katerina,

One of the biggest myths regarding life insurance is that group coverage offered at work is enough to protect you, family's future if something happened to you or your spouse. could that policy—typically worth no more than twice your annual salary—pay your mortgage, monthly bills, loans, and your children's ever-rising tuition? Could it sustain your small business, cover your spouse's retirement, or support your parents' long term care as they age?

The truth is, group term life insurance addresses only a small part of your financial obligations to your loved ones. **That's why getting a policy that meets all of your family's needs is so important.**

Since 1907, SBLI has protected hundreds of thousands of families like yours with affordable, dependable life insurance. In fact, we have consistently earned an A+ (Superior) from A.M. Best for financial strength, and our rates are among the lowest in the country for both men and women.

Sample monthly premiums for $300,000 20-year Fully-Guaranteed Level Premium Term Life Insurance, Preferred Plus Non-Nicotine:

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord; so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere.

Bishop of Trenton

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-510-545-0990 (a number in Northern California.) When it's finished transmitting, point your web browser to Fax.Tiny and it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

Located in the SE 1/4 of the NE 1/4 Section 4, Township 6 S Range 91 W S P M
SILLIVAN EXEMPTION, Lot 1

NOTICE

This permit to construct a well was issued on 9/18/2008. The expiration date of the permit is 9/18/2009. In order for the permit to remain valid, certain actions must be taken by the well owner. As of this date, the Well Construction and Test Report was received on 9/8/2008. The Pump Installation and Test Report has not been received. Furthermore, a request for extension of the expiration date have not been received by the Division of Water Resources.

This permit was approved under Section 37-90-137(2), Colorado Revised Statutes. The well must be constructed and the pump installed prior to the expiration date of the permit. These reports are the responsibility of the licensed water well contractors or the well owner. If the work was performed by the owner, The Well Construction and Test Report (GWS 31) and the Pump Installation and Test Report (GWS-32) must be received by the Division of Water Resources prior to the expiration date of the permit. These and other forms are available on our web site at http://www.water.state.co.us/pubs/forms.asp

If pumping equipment has not been installed in the well, the well owner may request, in writing, a one-time, one year extension of the expiration date. The request must be received with a $60.00 (sixty dollar) filing fee prior to the expiration date and must provide a reason or reasons for not constructing the well, installing pumping equipment and why the expiration date should be extended for an additional year.

If the well has been constructed, pumping equipment will not be installed by the expiration date and an extension of the expiration date has not been approved, the permit will expire and be of no force or effect. It will be necessary for you to obtain a new well permit by submitting a completed application for an existing well along with a $100.00 (one hundred dollar) filing fee.

If the well will not be constructed, and you be not wish to pursue construction of a well, please advise us in writing in order that we may formally expire the permit without requiring additional notification from you.

If the expiration date has already been extended for one year, the statute does not allow more than one extension of time. If the well construction and the pump installation reports are not received by the expiration date, the permit expires and is of no force or effect.

If you have any questions, please contact any of the Division Field Office in your area, or the Ground Water Information Desk in Denver at (303) 866-3587 between the hours of 8:00 a.m. and 4:00 p.m. Monday through Friday. Thank-you for your immediate attention.

Dear Parents,

Our summer break is just about over and school is around the corner. We are excited for a new school year and look forward to the new opportunities for the year ahead.

We have been busy this summer painting, repairing and fixing things for the school year. We have added another staff member for our new virtual 2nd grade ABEKA classroom. Our teaching staff is as follows:

Miss Megan	K3
Mr. Mayenne and Mrs. Bellemer	VPK
Mrs. Perdue	KS Art and Tutoring
Miss Coleman and Mrs. Tilton	1st and 2nd
Mrs. Carr	3rd and 4th
Miss Clark	5th and 6th
Co-Head teachers, Mrs. Smith,	7th
Mrs. Tyrell	8th 12th

Mrs. Bonin, Our Daycare and VPK Director and Mr. Andrew will be in the office, and Miss Casey will be in the lunchroom.

School orientation is scheduled for August 8. We will meet at 6:30 pm in the auditorium. It will be a busy evening. We plan to introduce our staff, make some important announcements and discuss pertinent information regarding the school. We will dismiss the younger grades all parents/guardians must leave our building with the remaining families. There will be a final session with High School students and families, before dismissing them to see their classroom. We hope to make this meeting as short as possible, however, it will be critical for all school families to be in attendance. For those families who may have children in several classes, please make sure to have a family member present for the entire meeting.

School begins on August 11th at 8:30 am. We anticipate a great year, and we are glad to have you as part of the SCCA family. Please feel free to contact me on my cell phone or call the school office if you have any questions or comments. We are here to assist you and look forward to working with your child.

Hi Danny

Can you try faxing from these fax machines that are having issues? ,or are these not close to you? I reset the voice gateways to see if that fixes the issue

Try faxing to Test 1 950A

and
I'll check on the fax at Nelson

Subject: Faxes at ECI and Nelson

I'm not sure if y'all are having the same problem there, but the Xerox at ECI, the Konica at Nelson, and possibly the Konica at ECHSD are having issues faxing. I've attached an error sheet from ECI. They can fax internally, but local and long distance faxes are not going through. Nelson is having the same issue with their Konica copier. Jermann said that she has received phone calls from some of the people she has faxed and they have said that they are only getting the first page of every fax she has sent, but this could just be an issue with the software they are... [illegible] Robin Harnett and Lorena Sanne have both called and stressed to me that they need this issue resolved as soon as possible ☹ Please let me know if there is anything I can try from my end.

Thanks,

Danny Madrigal

Examples
1. $-7^2 = -49$, not 49. According to the order of operations, exponentiate before taking the negative of the result.
2. $(2+1.2^2) = 4 + 4 + 8$. On the other hand, $(2+2)^2 = 4^2 = 16$. Remember the cross product terms!
3. $\frac{1}{2}(a+b))(\frac{1}{2}(a+b)) = \frac{1}{2}(a+b)^2 \neq \frac{1}{2}(a+b)^2$, not $\frac{1}{2}(a+b)^2$. Take a look at Common Error # 3.
4. $\sqrt{4(1+)} = 4\sqrt{1+}$. This illustrates the distributive law.

Common Errors

1. Error: $-(y-z) = -y-z$ **Correct Form:** $-(y-z) = -y+z$
Comment: You need to distribute the negative sign across all the terms, not just the first.

2. Error: $(x+y)^2 = x^2+y^2$ **Correct Form:** $(x+y)^2 = x^2+2xy+y^2$
Comment: Don't forget the cross term when squaring terms.

3. Error: $(\frac{1}{2}x)(\frac{1}{2}y) = \frac{1}{2}(xy)$ **Correct Form:** $(\frac{1}{2}x)(\frac{1}{2}y) = (\frac{1}{2}\cdot\frac{1}{2})(xy) = \frac{1}{4}(xy)$
Comment: There are two factors of $\frac{1}{2}$. Don't forget one of them.

Section 2: Factoring

Topic: Factoring

Questions from Precalculus Assessment

Solve the following equation for x.
$15x - 12 = 6x$
Explanation of Correct Answer:
$x = -\frac{4}{3}$. This is a quadratic equation. To solve it, first get all terms on one side of the equal sign with zero on the other side. Then either factor and find the values of x that will make the expression equal to zero, or use the quadratic formula.

Solve the following equation for x.
$0.7x^2 + 4.2x - 1.4 = 0$
Explanation of Correct Answer:
$x = -6.53,\ x = 0.64$. This is a quadratic equation, which you solve by using the quadratic formula.

milliseconds to zero. Make the same process and name the string "*content.notify.interval*" and enter a value of "0".

- Force Firefox to release reserved system RAM when the browser is minimized. **Right-click** anywhere in the "about:config" window, click on "**New**" and then select "**Boolean**". Name the entry "*config.trim_on_minimize*" (without quotes). Change the value to "**True**" and then click "**OK**". This setting forces Firefox to only reserve about 10 MB of system memory while minimized.

- Normally Firefox only sends one or two requests to the website. However, the more requests you use the faster you go. To change this, type in filter bar '*network.http.pipelining.maxrequests*' & change the value to "**150**". **Attention: The more requests you use, the more bandwidth you use, meaning you could use as many requests as you want but that would probably kill the entire bandwidth if everyone did that. 150 is a very good value.**

- Type "*network.http.pipelining*" in **filter bar** and set it to "**True**" by double clicking it.

- Type "**network.http.proxy.pipelining**" in filter bar, and set it to "**True**" by double clicking it.

Grand Opening Signage

New businesses in the City of Coral Springs are allowed to announce their Grand Opening in the following two (2) ways.

Temporary Grand Opening Banner

A temporary grand opening banner is permitted without permit, provided that the banner is no larger than forty (40) square feet. The banner may not be displayed for longer than 14 consecutive days. The banner can only be displayed within sixty (60) calendar days from the day you receive your business tax license. On the first day that the banner is displayed, you are required to mark the date on the bottom right hand corner of the sign.

Section 1806(G)(1) States

A banner sign only stating "Grand Opening," plus the name of the retailer, and limited to forty (40) square feet may be displayed for a period of time not to exceed fourteen (14) consecutive days after the actual initial opening for that business. The banner sign must be displayed within sixty (60) calendar days from the date of issuance of the occupational license. Such a sign shall not be attached to any landscaping feature. A statement indicating the expiration date shall be displayed on the lowest right hand corner of the front of the sign.

Banner

Temporary Grand Opening Ground Sign

Effective June 2nd 2009 a new 2 year pilot program was approved by the City Commission in which new businesses are allowed to have a temporary grand opening ground sign placed perpendicular to the roadway. The program installs a nine foot tall plywood sign which states "Grand Opening" at the top. The sign allows for a 15 square foot area in which the business can advertise on both sides of the panel. The City will work with the business on the correct location and announcement to be placed on the sign. Businesses are allowed to choose the amount of time in which they would like to have a temporary grand opening ground sign from 14 –30 days. The pricing is as follows:

- ☐ **14 days: $500.00**
- ☐ **22 days: $1,000.00**
- ☐ **30 days: $1,200.00**

A business must have received their business tax license within the past six months to be eligible for this program.

Ground Sign

One (1) temporary grand opening ground sign per street frontage may be displayed perpendicular to the roadway. This sign may be displayed for a period of time not to exceed fourteen (14) days after the actual initial opening for that business in conjunction with a grand opening banner as described above. The banner sign must be displayed within sixty (60) calendar days from the date of issuance of the occupational license. No such sign may be within one thousand (1,000) feet of another such sign along a single roadway of any given title. The property owner or authorized agent must contact the Community Development Division for sign placement and guidelines for this temporary grand opening sign.

[Space intentionally left blank]

Test Description and Clinical Evidence
BCI predictive and prognostic result outputs based on a 4-gene gene expression classifier (HOXB13/IL17BR, MKI67, STC2, and PGR) applied to the Breast Cancer INDEX™ (BCI) molecular assay.

BCI Predictive provides a measure of likelihood of benefit from extended (>5 years) endocrine therapy (ET).[1] Patients are classified as having a higher or lower likelihood of benefit. BCI Predictive is based on the ratio of the 2 biomarkers HOXB13/IL17BR and was validated in the NCIC CTG MA.17 trial.[2,3]

BCI Prognostic for node positive (1-3 positive nodes) provides an individualized estimate for a patient's risk of distant recurrence in the late (5-10 years) time interval (5-10 years post-diagnosis) based on post-treatment tissue biomarker expression. The risk category is provided relative to other patients with similar clinical characteristics. BCI Prognostic for LN+ patients (1-3 positive nodes) is based on the algorithm combination of the BCI gene expression result with the clinical and histopathologic parameters of tumor grade and size. BCI Prognostic for LN+ patients was validated in clinical trial patients with node positive (1-3 nodes) who were treated with adjuvant endocrine and chemotherapy.[1]

Important Use & Limitations
The Breast Cancer Index (BCI) Risk of Recurrence & Extended Endocrine Benefit Test is intended for use in patients diagnosed with estrogen receptor-positive (ER+) lymph node-negative (LN-) or lymph node positive (LN+ with 1-3 positive nodes), early-stage, invasive breast cancer, who are disease-free two (2) years post-diagnosis. It is a quantitative assessment of the likelihood of both late (post-5 years) and overall (5-10 year) distant recurrence following an initial 5 years of endocrine therapy (LN- patients) or 5 years of endocrine therapy plus adjuvant chemotherapy (LN+ patients), and 2) prediction of likelihood of benefit from extended (>5 year) endocrine therapy. BCI results are supportive to the ordering physician's workup, treatment decisions require correlation with all other clinical findings. This test was developed and its performance characteristics determined by Biotheranostics, Inc. It has not been cleared or approved by the U.S. Food and Drug Administration. This test is used for clinical purposes. It should not be reported as investigational or for research. New risk information is used to guide patient care is the responsibility of the physician. Biotheranostics is certified under the Clinical Laboratory Improvement Amendments of 1988 to perform high complexity clinical laboratory testing.

Current Population Survey (CPS) -- Frequently Asked Questions

Who uses this information? What is this survey all about?

In a country as big as ours and one that changes so rapidly between decennial censuses, people in government, business, and other groups need up-to-date facts in order to plan efficient and adequate programs. It is important to know how many people are working or out of work (to help direct programs which would contribute to an expanding economy and provide new jobs); how many children will be attending school (to plan for schools and the training of an adequate number of teachers); how many new families are forming (to plan for adequate housing to meet their needs), and so on. Occasionally we may combine data from the CPS with data from other government agencies to provide a comprehensive set of summary information about employment, income, and participation in various government programs. The CPS is one of the most important and timely sources of information used to make such plans.

How was I selected for this survey?

Actually, we selected your address rather than you personally for the survey. We scientifically select addresses that represent households in the United States. Every month approximately 59 000 households are selected to be interviewed. If you should move away while your address is still in the survey, we would interview the family that moves in.

How many times will I be contacted and how long will it take?

Our representatives contact occupants of a selected dwelling eight times—4 months in one year and the same 4 months in the following year. Our representatives contacted this address four times last year and your address is scheduled for four more interviews. In addition, we contact a small number of households twice during one of the 8 months to ensure the validity of our statistics and verify that our representatives are doing the best job possible. On occasion, selected households may be asked to participate in other surveys after they have completed their CPS interviews. On average a CPS interview should take about 10 to 15 minutes. Your interview may be somewhat shorter or longer than this depending on such things as the number of adults in your household or the type of questions asked in a given month. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Demo Survey Comments 0607-0049 U.S. Census Bureau 4600 Silver Hill Road ADDP 7H054 Washington D.C. 20233. You may e-mail comments to DEMO.PAPERWORK@census.gov; use "Demo Survey Comments 0607-0049" as the subject.

What protection do I have? Is this survey authorized by law?

All information individuals give to the Census Bureau is held in the strictest confidence by law (Title 13, United States Code, Section 9). Title 13, United States Code, Section 182, and Title 29, United States Code, Sections 1 through 9, authorize the collection of most of the information we request in this survey. In some months, the survey may contain questions authorized under laws other than those cited; further information concerning the authority for any particular portion of the survey can be obtained from the representative who contacts your household. The Office of Management and Budget Control number for CPS is 0607-0049. Without that number we would not be able to conduct that survey. To ensure your protection, the laptops used for the data collection are password protected and all survey responses are encrypted.

Why do you include me? I'm retired.

Some retirees may feel that their activities are not important to this type of survey and wonder why we include them. In order to have an accurate picture of the entire population, it is necessary to include people in all age groups. Our experience with interviewing retirees shows that many are participating in the labor force because they work part time or are looking for work. This information, along with data on other subjects such as income, health, and housing, assists in measuring the economic condition of the elderly population as a whole.

Lord, keep me in

protected forever!

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it just to make sure it works How can I do that?

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number Within a minute your fax should appear on the site Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero this site lets you send faxes for free to anywhere in the United States and Canada Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax

Congratulations! You have successfully installed your printer

Locate the product user guide
View information about the product usage, troubleshooting, warranty specifications, and support. The user guide is available in both CHM (HTML) and PDF format on the CD-ROM that came with the product and is in the HP program folder on your computer program group for the printer in the Windows Start Menu.

Avoid spots or lines on copies or scanned documents
Spots or lines are frequently caused by debris on the scanner glass. Clean the glass by using a soft, lint free cloth or sponge that has been moistened with nonabrasive glass cleaner. See the product user guide for more information.

Optimize copy quality
The factory-set default for copy quality optimization is "**Automatic**." If this default mode does not yield acceptable copy quality, four copy optimization settings are available: **Text**, **Mixed**, **Film photo**, and **Picture**. When making a copy of a photo or graphic, select the **Film photo** setting for photos or the **Picture** setting for other graphics to optimize the quality. Select the **Mixed** settings for documents that include both text and graphics. These settings are accessible through **Copy Menu** on the control panel. Explanation of the four copy modes is available in the product user guide.

Manage color
Setting color options to **Automatic** in the printer driver typically produces the best possible print quality for color documents. Select **Print in Grayscale** in the printer driver to print a color document in black and white. Use the **Manual** option to adjust the neutral-gray color treatment, halftone, and edge enhancements for text, graphics, and photographs.

Get support and check device status
HP ToolboxFX software is a program (PC ONLY, Windows® XP and Windows Vista®) that you can use for the following tasks.

- Check the product status
- Check the supplies status and shop online for supplies
- Link to product support
- Access HP ToolboxFX through the HP program group for this printer in the Windows Start Menu

A practical, affordable solution for precision power management

The Powerware EMS Upgrade Kit includes a wall-mounted enclosure with one or two panels and an optional LCD. A single panel can monitor up to 42 circuits; a two panel configuration up to 84 circuits in a standard, three-phase application. Current transformers (CTs) monitor branch circuits on attached panelboards—measuring and storing energy parameters for each individual circuit—so you can manage power with greater precision.

Easy to deploy and use

The EMS Upgrade Kit is a packaged, pre-tested, stand alone solution. It is designed for Upgrade into existing third party PDUs, RPPs, panel boards or other equipment. The unit comes with its own bracket for wall-mounting and can be installed and used without disconnecting (and/or removing) power to the distribution equipment being monitored.

An easy-to-use software tool is included to configure start-up settings and options. No preventive maintenance or annual calibration is required. You get a new, cost-effective power distribution without adding complexity to the infrastructure.

Important power information at a glance

A large, local LCD display—eight lines by 40 characters (many times larger than competitors' offerings)—is a popular option. This display delivers a rich array of information about status, events and alarms at any level. Navigate easily through system functions using buttons and contextual menus that are organized into logical categories.

Visibility and control from anywhere

A Power Xpert Gateway Card installed in an X-Slot® communication bay enables remote monitoring over your Ethernet LAN. You can view detailed power parameters using a Web browser, email, an SNMP-compatible network management system or a Modbus-compatible building management system.

Cost-effective insurance against tripped circuits and unplanned shutdowns

Branch circuit monitoring technology has been field-proven for years. Recent advances in technology and design have made these capabilities more affordable than ever. When comparing features and balanced specifications of different systems, you will quickly see that the Powerware EMS provides more all-in-one functionality than other vendors' offerings. It has the most sought-after features and the broadest, fine-tuned measured and reported parameters.

With the EMS Upgrade Kit, now you can extend this intelligent layer of visibility and control to distribution equipment that was never designed to include these capabilities. Find out more about how the Powerware EMS and its Upgrade Kit can help you manage the management of your diverse, multi-vendor power distribution system.

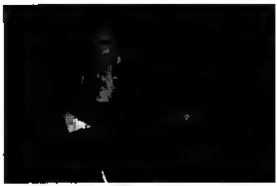
Bernie's Spinal Surgery on CEOs

A few firms are finally standing up to defend themselves from the left's nonstop attacks.

FRI

TEST



General Electric CEO Jeffrey Immelt. PHOTO: BLOOMBERG NEWS

By KIMBERLEY A. STRASSEL
April 14, 2016 7:22 p.m. ET

Verizon CEO Lowell McAdam is receiving hosannas for his takedown Wednesday of Bernie Sanders, in which he ripped the presidential candidate's views on corporate America as "uninformed," "contemptible," and "wrong"—among other things. He'd be worthy of even more praise had he also applied those words to the "Not I" business community that helped create this moment.

Mr. McAdam is right that Mr. Sanders is wrong. American businesses aren't immoral. They create jobs, prosperity, investment and tax revenue. They are the essence and the requirement of a democracy. Far from an immoral system, U.S. capitalism is the wonder and envy of the world. The greater wonder is that it remains so, despite the punillanimous behavior of its most prominent representatives.

It has been many a year since corporate America could claim to have an intact spinal system, though its retreat into nervelessness has accelerated over the past decade. We've reached a moment at which Mr. Sanders, Hillary Clinton and Elizabeth Warren can daily tar companies as the villains of the world, and receive applause from voters both left and right. Blame it on the great recession. Blame it on a litigious environment; blame it on President Obama. But mostly blame it on the companies themselves. When asked time and again who among them would stand up for the American way, they mumbled "Not I."

Rosa Parks is known as the "mother of the Civil Rights movement." She was arrested, fingerprinted, jailed, and fined $14.00 in 1955 in Montgomery Alabama, because she refused to give up her seat on a city bus to a white man. Parks's courageous stance made it possible for African Americans to sit in any available seat on a bus intended for public transport.

Hybrid Technologies, Inc. (OTCBB:HYBR) High Powered Green Racing Vehicle makes cover and feature story in Volume 3 April Issue of Motorsports Industry West

THE BULL'S BRAINS

For those of you unfamiliar with **The Energy Bull**,

"The Bull's Brains" is here to explain to you why we believe the current pick is a WINNER.

Hybrid Technologies Inc. (OTCBB:HYBR) is in the sexiest vertical going – and in a going green. From **George Clooney** (who's set to drive an HYBR unit" car in Italy to the everyday guy volunteering about reducing gas prices – **$4.00/gallon is a $100/barrel**. We consistently see green tech companies on the DJI and Pinksheet market. You have a product line, money in the bank and minimal debt – exposure like **HYBR** does. There are also whispers of shorted shares which could lead to a open-and-shut "short squeeze" that would drive the price of HYBR beyond analyst forecasts – Sec 004 and 2006. With names like **Wal-Mart, NASA, Forbes, Business Week** and **Volkswagen** all in some way related to the company – it is just a matter of time before **HYBR** takes off. Did we mention this industry is valued at **$36 billion**. How about **Hybrid Technologies'** breakthrough which puts them miles – had else – on a knows ahead of the competition.

If you like what you saw with VNGM take a good hard look at HYBR and GET RIDING!

Google Drive for Event Planning

Prepared by Geronimo Desumala March 2016

Overview

What is Google Drive?

Google Drive is a file storage and synchronization service created by Google. It allows users to store files in the cloud, share files, and edit documents, spreadsheets, and presentations with collaborators.

In layman's terms, it is as if you have Microsoft Office (Word, Excel, Powerpoint, etc.) on the internet, access the same files and documents. Nothing is ever stored on some individual's computers. Whatever changes are made by one person, another person can immediately see. And this is all tracked (who and when), and ultimately reversible in case of a mistake. It is a completely collaborative environment. It eliminates the need for sending documents by email (increasing the likelihood of confusing versions). No one person needs to maintain a set of files on his/her personal computer. Only one most up-to-date version/master is ever kept in the cloud.

Sharing

One or more people can administer the Google Drive folders (folders just like on your desktop), and who gets to view and/or edit what. Anyone can share the Google Drive if they have a Google Account set up. It is a misnomer that people need a Gmail account to use Google Drive: anyone can create a Google Account—that is without a free gmail account—using their work supplied email address for example).

Everything can be viewed from anywhere in the world at any time so long as there is an internet connection, from a desktop computer to tablet, to smart phone.

Compatibility with Other Applications

Google Drive has a proprietary set of web-based software for preparing documents (Docs), spreadsheets (Sheets), etc. While Google Drive software doesn't necessarily have all the rich features of Microsoft Office applications, it does get the job done. Meanwhile, Word documents can be converted to Google Docs, Excel sheets can be converted to Sheets, etc. And the reverse is true. Additionally, Google Drive can export documents to other files such as PDFs, and therefore downloaded to an individual's computer for sharing, printing, publishing, that way. The catch is that only Google documents (or Word documents and Excel sheets *converted* to Google docs) can be edited collaboratively.

Google Drive as a Tool for Event Planning and Management

Keeping Track of Tasks and Work Flows

Tasks and assignments can be tracked for example in a spreadsheet, marking person responsible, deadlines, and level of priority. Additional information can be added, such as budget allocation.

Contact management (RSVPs)

A master list of guests/invitees can be maintained. Separate individuals or institutions can go into a spreadsheet of guests and add their own (including as much detail as possible e.g. proper salutations for protocol, level of seniority or priority, email address, phone numbers, assistants' names,

This is news story in concerns of a breach o contract for repairs of a single wide mobile home at Country Side Village Mobile Homes but this goes beyond that

A) There's fraud where the contractor illegally entered into contract for mobile home repair
B) There's suppression of evidence where on appeal the trial court has not listed nor submitted physical evidence to district court for review
C) There's a judge who would not budge who's seeking election to district court who disallowed submission of a written statement and expert contactor bids/evaluations showing that there's thousands of dollars of work that the original contractor did not do
D) There's a preacher who's a principal who appears to have no principles in lying in testifying that he would showcase his incomplete work to obtain future customers.
E) There's an appeal that upon review will be absent of the facts.

This is a story that I hope to be newsworthy For further details and/or questions please feel free to contact me

FAQs & Troubleshooting

Date: 12/17/2014 ID: faq00002788_003

Stop my Brother machine from automatically redialing a busy number.

If you are sending a fax automatically and the recipient's line is busy, your machine will automatically redial that number up to three times at five-minute intervals. If the number is still busy when your Brother machine redials it, you must re-send the fax.

The machine will automatically redial only if it detects a busy signal on the recipient's line

If you are sending a fax manually (by lifting the machine's handset or pressing its **Hook** key or lifting the external phone's handset, listening for the fax tones, and then pressing the **Fax Start** key to send) and the recipient's line is busy, your machine will **not** automatically redial the number

Canceling automatic redial

To stop your machine from automatically redialing, follow these steps.

1. Press **Menu** => **Fax** => **Remaining Jobs**
   - **The LCD** will display any numbers awaiting redial
   - If no jobs are awaiting redial, the LCD will read **No Job Waiting**
2. Press the **LEFT OR RIGHT ARROW** key to choose the number you want to stop the machine from redialing
3. Press the **Set** key.
4. Do one of the following
   - Press **1** to cancel the job

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States). When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

TESTING. . . .

TESTING. . . . IS THIS THING ON? PLEASE LET ME KNOW IF YOU DON'T GET THIS.

Dear Dylan,

You have been a great boy this year and I hope you like your presents. Please tell mom and dad to not leave the fire on so late, I burned my fanny a little but I am alright I hope you don't mind that I gave Oliver and Simba some treats – they would not quit rubbing on me – ho ho ho

It's getting late and I have many more stops to make tonight. Mind your mother and father and I will see you next year

MERRY CHRISTMAS !

A student uses a computer fitted with a large red button that can be used to execute commands. The device, provided by S.A.W. helps those with disabilities who cannot use a mouse and keyboard.

"We received some from a county agency last year," Bitterman says. "Two hundred really nice Pentium IV machines that were outdated for them but for our purposes were excellent. Two adaptive computers specialists from the CCBMR/DD assistive technology department and a small group of volunteers work with Bitterman to prepare the donated computers for distribution to people with disabilities once they are refurbished.

At Clear Channel Radio in nearby Independence, Ohio, IT manager Marty Kilroy says that in the past, obsolete computers would end up in the basement of his building. Because of limited storage space and environmental concerns, Clear Channel chose to donate its computers to S.A.W. after learning about its mission of providing computers to clients of CCBMR/DD.

Over the past two years, Clear Channel has donated 40 PCs and a smaller number of monitors to S.A.W. Clear Channel expects to donate more computers as they are replaced by newer models.

Over the last five years, Solutions at Work has refurbished more than 1,200 computers for use by people with disabilities. When needed, the PCs include adaptive technology.

Smart. Simple.

Want to ZONE in on a health plan that's right for you? We've got you back.

Why ZONE is a great choice

- **Extensive coverage.** SureHealth™ ZONE plans 5 and 6 offer extensive coverage for prescription drugs, dental, vision care, extended health care and emergency medical travel protection. And preferred hospital accommodation is an optional benefit you can add to either plan if you want to increase your coverage even more. It's up to you.
- **Economical rates.** Given the valuable protection ZONE 5 and 6 plans offer, you're sure to find affordable rates. Need we remind you:

If you have medical conditions when you apply for ZONE plan 5 or 6, it's likely you'll face a waiting period or an exclusion for coverage that excludes those specific conditions.

- **Qualifying is easy.** You're eligible to apply for ZONE plans as long as you are a Canadian resident under 75 years of age and have valid provincial health insurance plan coverage. Best of all, there are no time limitations – you can apply even if you've never had group or employee health benefits before!

Why SureHealth is the right choice

- **No waiting period.** With a SureHealth plans, your coverage will begin the first of the month following approval of your application.
- **Benefits for life.** When your application is approved, your SureHealth plan will cover you for life – no matter what your age or long as you payment is made.
- **Coverage that goes where you go.** Your coverage will go with you and is yours to keep – regardless of who you work for or whether you're self-employed, work regular contract, freelancing or retired.
- **Hassle-free claims.** Most of your claims can be processed instantly using your GSC ID card, or can be paid through direct deposit – so you won't have to wait for a cheque to arrive in the mail.
- **Tax advantages.** If you're self-employed or a small business owner, your SureHealth payments may be a tax-deductible business expense, making your coverage even more economical!†
- **Confidence.** Unlike regional plans from many insurers that only cover you in certain provinces, SureHealth is offered by GSC, Canada's only national not-for-profit health and dental benefits specialist. So you'll have the added security of knowing that if you move your coverage will move with you.

It's Time for the Jews to Stand Up for Themselves: My Speech at Brooklyn College

By David Horowitz

I was not looking forward to my speech at Brooklyn College last night during "Israel Apartheid Week." The campus atmosphere was so hostile to Jews that no student organization was willing to host my appearance not even the Jewish organizations – and with 3 500 Jewish students on campus, there were several. My visit was only made possible by the courage of one professor, Mitchell Langbert, who reserved a room in the school library and the bravery of one student Yosef Sobol a Jewish immigrant from Ukraine who organized the event.

The college paper *Excelsior* is edited by a 9/11 "truther" who has declared on the Internet that a memorial skull be erected to Mohammed Atta and the 9/11 terrorists and who has turned the *Excelsior* into an anti-Israel propaganda sheet. Despite the fact that the Jews who attend Brooklyn College are members of a minority who are the victims of eight times the number of hate crimes that are committed against Muslims — let alone Arabs — according to FBI statistics, faculty required all incoming freshman to read a single book about discrimination against Arabs in America: "How Do It Feel To Be A Problem?" Faculty also hired an instructor who was an activist for Hamas and [illegible] terrorist state in Gaza.

For two weeks prior to my arrival an adjunct professor at the college had been calling on students and political radicals to protest my appearance, while denouncing me as a "racist" and "McCarthyite." This professor is a Muslim member of the International Socialist Organization, a communist party that seeks a "dictatorship of the proletariat" in America. He urged students and outsiders to attack the event both outside the auditorium and inside it during my speech.

My bodyguard – a requisite at any campus at which I speak – called campus security two days before the event and was told the policy of the university was that protesters who intend to obstruct my speech would not be removed from the room. Consequently, I was fully prepared for the fact that I might not be able to speak at all and readied myself for the battle.

But then something totally unexpected happened. A creature of the CUNY system Jeffrey Wiesenfeld was aware of Yosef's efforts and decided to intervene. He demanded that the university protect the students who had invited me and to see that their event took place. In all my years traveling to over 400 universities this had never happened before. As a result of Wiesenfeld's intervention there were seven armed and uniformed guards at the entrance to the hall. They inspected each individual's wending them and searching their bags before they entered. The campus Chief of Public Safety was there too along with an official from the university who warned would-be protesters that they would be removed if they obstructed my speech.

And so I was able to speak for an hour in a civil atmosphere, and the students who came were able to hear what I had to say. Let me pause here to say that campus violence which comes exclusively from leftists and Muslim radicals, and the obstruction of speakers which comes exclusively from the same source, would disappear if university administrators did their jobs and if university trustees met their responsibility to ensure that an appropriate atmosphere prevails on their campuses. Would that there were a hundred trustees like this one.

Brooklyn College is a commuter school and it was a blustery and rainy evening but the library auditorium was filled with 500 people, mostly young, virtually all of them either Jewish or Palestinian with the Jews representing about 80 percent of those present. I began by asking every person how it felt to go through a "check point" – the "injustice" of checkpoints being a focus of recent demonstrations by the newly created "Palestinian Club" whose members constituted 20 percent of the audience that night. I said, "Well, our checkpoints made me feel safe, and that is the point of checkpoints – to protect the innocent from attacks by people who want to kill them."

I then addressed the atmosphere of intimidation that prevailed at Brooklyn College as a result of the activities by the anti-Israel and pro-jihad left. The Brooklyn College administration had

BACK

At present a request for deusity output cards in a sensitometric computations run yields density cards correspondiug to densitometer densities If the test code used involves E N D conversions the deusity output cards must be run through a separate conversion program to correspond values is If plotted values are desired corresponding to individual strips are puuched, wh emeasured and strips is u desired

I prop the switch that causes deusity card output is requested, *plotted* densities are punched out In the normal case these would simply be the average densities If the test code calls for E N D conversion it would be the E N D deusities that are puuched out If the test breaks down a g beeausa of range check failure, we would get cards punched out for individual strips, since individuals are plotted in that case

SAVE REVOLUTION BOOKS

Humanity Needs *Revolution*

Revolution Needs *Revolution Books*

Revolution Books Needs *You*

Revolution Books needs your support now. RB's lease has come up for renewal and your support is essential. There is no other place like RB — where people discover and engage the world and the possibility for radical change — a bookstore at the center of a movement for revolution. **Become a sustainer of RB today, Donate funds, Buy books. Come to RB. Experience it.**

The horrors of the world are right there in front of us. Just turn the pages of the paper or surf the news channels. We wear the labor of hundreds of women workers killed in Bangladesh. U.S. drones slaughter whole families in Pakistan's tribal areas. Hunger striking prisoners at Guantánamo are force-fed; prisoners in California's prisons call a hunger strike against conditions condemned internationally as torture. The ecology of the planet is threatened with destruction. The drumbeat for US imperialist military action in the Middle East grows louder by the day. The Obama administration backs sweeping new measures limiting basic rights. The number arrested under "stop and frisk" just reached 5 MILLION, feeding a generation of young people of color into a system of mass incarceration.

At a time when humanity is facing unspeakable horrors and the world cries out for revolution, there is one bookstore where you can find the books and the deep engagement about why the world is the way it is and the possibility of a radically different and better way the world could be. That store is **Revolution Books**. Scientific and poetic wrangling and visionary. Revolution Books is at the center of building a movement for revolution. *Yet its existence and growth requires new sources of support — it needs YOUR support. It is a rare resource for the future of us all. It must not be lost.*

Revolution Books is where all can learn that the possibility for emancipating revolution exists. It is where you can find and dig into the work of Bob Avakian, who over several decades has summed up the positive and negative experience of the communist revolution so far, drawing from a broad range of human experience. As the result, a new synthesis of communism has been brought forward — a viable vision and strategy for a radically new society and world, and there is also the crucial leadership that is needed to carry forward the struggle toward that goal.

This vision so needed now in the face such global horrors, opens up the whole political atmosphere to the possibility of fundamental change providing a way out of the madness. At **Revolution Books** you can partake in a rebellious spirit that refuses to accept the horrors of today's world. Revolution Books promotes the wide ranging scope of intellectual work, ferment and dissent that is integral to the emancipation of humanity, offering an amazing collection of books and DVDs on history and political theory, novels and poetry, atheism and science, geopolitics and philosophy, visual art and film — as well as children's literature and books in Spanish.

With its regular programs of mind-expanding events — book readings, debates, discussions, film showings, musical performances — **Revolution Books** invites participation and engagement in the search for a new way for the world. And, it is where people can connect with the movement for revolution.

Can you think of a bookstore that is more needed?

Visit Revolution Books. Buy your books there. Make a financial contribution. Become one of 100 new monthly sustainers who commit, in the next few months, to keep this store open in Manhattan. When you become a sustainer, you get a discount and a Revolution Books coffee mug, but you get something far more important: a bookstore at the center of building a movement for revolution.

My Vision Express S3

Guitar Chords and Lyrics of Besame Mucho

Besame Mucho is a song written in 1940 by the Mexican composer Consuelo Velázquez. It must be the most famous song in the Spanish language, and I'm sure to see why. It was very catchy (I can't get this song's melody out of my head, it's been days now...)

I made an arrangement of Besame Mucho for guitar. It is as suitable **singers** to accompany themselves with. I didn't include the melody in the arrangement - only the chords and a bass line. I also tried to keep it as simple as possible so it would be easy to play and sing at the same time.

Here is the **mp3** of my Besame Mucho arrangement

Here is the **guitar chord chart**: not a lot of chords and all are fairly basic

Besame Mucho Guitar Chord Chart

Some remarks about the chords:

1. Bm7(b5) - another name for this chord is B half- diminished
2. F - I play the bass note of this F chord with my thumb
3. F#7 - this is an F diminished 7th chord - I love! This chord is used in six places where F#7 is originally played and sounds like an F7b9
4. Am, E - these are good chords to end songs on

Here are the guitar tabs for my arrangement of Besame Mucho

watches. Left: Troy sets aside his savings.

Bringing a challenging goal within reach

While we all know how expensive [illegible] tax-advantaged investing and an extended time horizon can go a long way toward helping you meet your goal.

As you can see in the table below, over 18 years a $100-per-month investment in a 529 college savings plan can grow to nearly $40,000 — an amount that, thanks to favorable tax treatment, is about 24% larger than an equivalent investment in taxable investments.

And even if you are getting a later start, setting up an investment program can make a meaningful difference in the size of your child's account by the time he or she may need to borrow to pay for school.

This example assumes an 8% annual rate of return (compounded monthly) for both investments. The taxable example shows returns on regular mutual fund investments that are subject to both annual income taxes and capital gains taxes. The current federal tax rates on capital gains and dividends (more than the taxable investment returns higher, thus reducing the difference between the two ending values in the chart. The results shown here are not intended to represent an investment in a specific fund and, of course, a program of regular investing does not guarantee a profit or protect against loss. Your investment experience will differ.

Then, prior to a sizable one based on current estimates, Troy's education at a public university could total more than $140,000. If a private school like ISU is the case, that figure could nearly triple.

"You look at the amount and it can be pretty scary," says Nikki. "We're not certain we can pay for the whole thing, but we're not saying away from it.

Just after Troy was born, the couple worked with their adviser to establish a 529 college savings plan. Their strategy combines systematic monthly investments with birthday and Christmas gifts from Troy's grandparents and extended family. The account's assets have also grown thanks to a highly tool in the father and son developed as soon as Troy began walking.

"Every night when Bobby comes home, he takes the change he's collected over the course of the day and hands it to Troy to deposit in his piggy bank," explains Nikki. "On Troy's first birthday, we opened it up and deposited the money in his 529 account. Also, sometimes when we have friends and family over, Bobby
